

Sherif E Issa

Head of department; Health & Environment Affairs

The Egyptian Company for Mobile Services [Mobinil]

Received his masters in Civil / Environmental engineering form City University of New York in 1985 and joined Mobinil in 2000 bringing along 15 years of experience.

Sherif was instrumental in maintaining and continuously improving Mobinil's environmental management system and its ISO 14001 certification. He has also managed several other projects, most recently an initiative to measure EMF levels at Cairo locations and comparing it to safe thresholds; a vast project in collaboration with Cairo University and the first of its kind in Egypt.

Other initiatives included socio-environmental studies about solid waste management, sustainable recycling and transfer of high pollutant industries out of major cities.

He is a founding member of the Egyptian Society for Non-Ionizing Radiation Protection [ESNIRP]; a society the mirrors targets and activities of ICNIRP on a local scale. He's also a member in the health policy core group of GSM Association.
